Master Lock offers best practice solution for confined spaces

Scheduled shut-downs and turnarounds take time. During a shut-down or turnaround there are often times or situations that require a confined space to be left unattended. During these periods that no one is working within a confined space, proper marking and restricted access are necessary.

Master Lock developed confined space covers to protect against unauthorized entry and keeping employees safe, while also guarding against environmental annoyances such as pest/animal infestation, litter, debris and weather.

Easy-to-use and apply, Master Lock Confined Space Covers provide effective all-in-one warning signage and barrier protection for unattended confined spaces. Choices include ventilated and solid covers with four different sizes from small to x-large.

Models Available:

- S201CS: Elastic, Non-Lockable
- S202CS: Ventilated, Lockable
- S203CS: Solid, Lockable

About Master Lock®

Master Lock was founded in 1921 and is the world's largest manufacturer of padlocks. The company caters for a wide variety of markets and has been responsible for numerous innovations, including the invention of the laminated steel padlock. Information on the comprehensive Master Lock range of specialist LOTO equipment is also available at <http://www.materlock.eu>
