Master Lock offers best practice solution for pipeline maintenance

Master Lock developed a Blind Flange Lockout device that fully conceals flange bolts to prevent accidental removal of the blind. It provides workers positive control over the blind and protection from accidental release of vapors, chemicals and other hazards until they remove their personal safety padlock when work is complete:

- 3 sizes available
- 4 locking holes allow for multiple workers to lockout device at one time
- Durable aluminum and hardened steel construction withstands extreme conditions

About Master Lock®

Master Lock was founded in 1921 and is the world's largest manufacturer of padlocks. The company caters for a wide variety of markets and has been responsible for numerous innovations, including the invention of the laminated steel padlock. Information on the comprehensive Master Lock range of specialist LOTO equipment is also available at <http://www.masterlock.eu>
