## **Master Lock to emphasize convenience with durable Locker Lock products at EDspaces**

### **1652 series and Multi-User locks save valuable maintenance time**

(MILWAUKEE, WIS.) – October 23, 2014 – Master Lock Company LLC (booth 1110) will demonstrate how a facility can save on maintenance time by showcasing their newest products at this year’s National School Supply and Equipment Association’s EDspaces show. The game changing, 1652 Series Built-In Combination Lock and the Multi-User Lock will be featured - along with Master Lock’s robust line of combination and key operated locks – including ADA compliant models. See these products October 29-31 at the Tampa Convention Center.

“The convenience factor offered with these products is higher than ever before. For example, the new combination change process with the 1652 series lock will save any maintenance staff valuable time,” said Kevin McCarthy, Master Lock Product Manager for Locker Locks. “Since there is no button to push, the whole process can be done on the outside of the locker with just a control key. No more opening every single locker door in the school.”

The button-less process also prevents any possibility of an accidental combination change due to an overstuffed locker, since there is no button on the inside of the locker. To see how the new combination change process works, click here: <http://bit.ly/1p6CfWa>.

“The 1652 sports the same great features like an extra-long spring action bolt that ensures users the locker door will lock automatically. It also boasts an updated octagonal shaped dial for easy gripping. Separate models are available for left hinged doors (1653) and to meet ADA compliance (1656MKADA). Metal dials (MD) are available in five different colors: red, blue, green, purple and black.

Also on display is the Multi-User Lock, easy to use and designed for facilities with multiple people using the same locker throughout the day. The user sets their own personalized 3-digit combination they can remember, which eliminates staff duties such as key, lock or combination distribution and saves on maintenance time from forgotten combinations or lost keys.

Color dial combination locks promoting school spirit, Letter Locks and ADA Solutions are among the wide range of other products on display at EDspaces. This includes the 1525 EZRC Simple Combo™ combination lock.
