## **Master Lock introduces Extreme Environment Safety Product Covers**

(MILWAUKEE, WIS.) – February 20, 2014 – Master Lock Company LLC now offers a new line of safety padlock covers that protect your padlocks from extreme conditions in environments where Lockout/Tagout procedures are performed. These highly durable Master Lock® Extreme Environment Safety Padlock Covers are available for American Lock® A1100 series Aluminum Locks, Master Lock 6835 series Aluminum Locks, and 406, 410, 411 and S30 Zenex Thermoplastic Locks.

Constructed from Thermoplastic Elastomer (TPE) material, the covers are built and designed to seal the shackle and keyway to help keep out dust, grime and other debris that can damage the lock components.

“We now have a convenient solution for padlock protection,” said Jessica Nelson, Associate Product Manager for Master Lock Company LLC. “The covers seal the shackle and keyway and the key cap provides quick, convenient access to the keyway.”

Master Lock Extreme Environment Safety Padlock Covers are sold as a “COV” option when purchasing a safety padlock and are applied to the padlock during manufacturing. 400COVERS (for 406 and 410 padlocks), 411COVERS (for 411 padlocks) and S101 (for 6835 and A1100 series padlocks) can also be purchased in bulk packs of 12, and S30COVERS (for S30 padlocks) can be purchased in packs of 72. For more information about these products, visit [www.masterlocksafety.com](http://www.masterlocksafety.com).
